

JOURNAL OF APPLIED PHYSIOLOGY

JUNE 2010/Volume 108, Number 6

INVITED EDITORIALS

- On the regulation of the blood supply to the brain: old age concepts and new age ideas (see "Phenylephrine decreases frontal lobe oxygenation at rest but not during moderately intense exercise," page 1472)
P. N. Ainslie and Y. C. Tzeng 1447
- What does glycolysis make and why is it important? (see "Lactic acidosis in vivo: testing the link between lactate generation and H^+ accumulation in ischemic mouse muscle," page 1479)
G. A. Brooks 1450
- Does your (genetic) alphabet soup spell "runner"? (see "Using molecular classification to predict gains in maximal aerobic capacity following endurance exercise training in humans," page 1487)
M. M. Bamman 1452
- Genetics-based performance talent research: polymorphisms as predictors of endurance performance (see "A common haplotype and the Pro582Ser polymorphism of the hypoxia-inducible factor-1 α (*HIF1A*) gene in elite endurance athletes," page 1497)
M. Schoenfelder 1454
- Learning from legacies: fiber types, phenotypes, and human performance (see "Myocellular basis for tapering in competitive distance runners," page 1501)
B. F. Miller and M. S. Hickey 1456

REVIEW

- Missing links in pressure ulcer research—An interdisciplinary overview
C. G. Olesen, M. de. Zee, and J. Rasmussen 1458

HISTORICAL PERSPECTIVE

- Why has reversal of the actin-myosin cross-bridge cycle not been observed experimentally?
D. S. Loiselle, K. Tran, E. J. Crampin, and N. A. Curtin 1465

-
- Phenylephrine decreases frontal lobe oxygenation at rest but not during moderately intense exercise
P. Brassard, T. Seifert, M. Wissenberg, P. M. Jensen, C. K. Hansen, and N. H. Secher 1472
- Lactic acidosis in vivo: testing the link between lactate generation and H^+ accumulation in ischemic mouse muscle
D. J. Marcinek, M. J. Kushmerick, and K. E. Conley 1479
- Using molecular classification to predict gains in maximal aerobic capacity following endurance exercise training in humans
J. A. Timmons, S. Knudsen, T. Rankinen, L. G. Koch, M. Sarzynski, T. Jensen, P. Keller, C. Scheele, N. B. J. Volvaard, S. Nielsen, T. Åkerström, O. A. MacDougall, E. Jansson, P. L. Greenhaff, M. A. Tarnopolsky, L. J. C. van Loon, B. K. Pedersen, C. J. Sundberg, C. Wahlestedt, S. L. Britton, and C. Bouchard 1487

(Continued)

Cover: The April through June 2010 Highlighted Topics series examines Central CO_2 Chemoreception in Cardiorespiratory Control in a series of review articles written by a panel of international experts. This series was conceived and edited by Guest Editor Eugene Nattie and Coordinating Associate Editor Jay Dean. We acknowledge Steve Graepel, illustrator of the cover design. This illustration is copyrighted by Steve Graepel and reproduced with permission.

(Contents continued)

- A common haplotype and the Pro582Ser polymorphism of the hypoxia-inducible factor-1 α (HIF1A) gene in elite endurance athletes
F. Döring, S. Onur, A. Fischer, M. R. Boulay, L. Pérusse, T. Rankinen, R. Rauramaa, B. Wolfarth, and C. Bouchard 1497
- Myocellular basis for tapering in competitive distance runners
N. Luden, E. Hayes, A. Galpin, K. Minchev, B. Jemiolo, U. Raue, T. A. Trappe, M. P. Harber, T. Bowers, and S. Trappe 1501
- Age and load compliance alter time to task failure for a submaximal fatiguing contraction with the lower leg
E. E. Griffith, T. Yoon, and S. K. Hunter 1510
- Fuel selection and cycling endurance performance with ingestion of [¹³C]glucose: evidence for a carbohydrate dose response
J. W. Smith, J. J. Zachwieja, F. Péronnet, D. H. Passe, D. Massicotte, C. Lavoie, and D. D. Pascoe 1520
- The innervation and organization of motor units in a series-fibered human muscle: the brachioradialis
Z. C. Lateva, K. C. McGill, and M. E. Johanson 1530
- Airway response to emotional stimuli in asthma: the role of the cholinergic pathway
T. Ritz, A. Kullowatz, M. D. Goldman, H.-J. Smith, F. Kannies, B. Dahme, and H. Magnussen 1542
- An integrative model of motor unit activity during sustained submaximal contractions
J. L. Dideriksen, D. Farina, M. Baekgaard, and R. M. Enoka 1550
- Dose effect on intramuscular metabolic stress during low-intensity resistance exercise with blood flow restriction
T. Suga, K. Okita, N. Morita, T. Yokota, K. Hirabayashi, M. Horiuchi, S. Takada, M. Omokawa, S. Kinugawa, and H. Tsutsui 1563
- Diastolic function is strongly and independently associated with cardiorespiratory fitness in central obesity
M. Turzyniecka, S. H. Wild, A. J. Krentz, A. J. Chipperfield, G. F. Clough, and C. D. Byrne 1568
- Systemic low-dose aspirin and clopidogrel independently attenuate reflex cutaneous vasodilation in middle-aged humans
L. A. Holowatz, J. D. Jennings, J. A. Lang, and W. L. Kenney 1575
- Effects of exercise training on dendritic morphology in the cardiorespiratory and locomotor centers of the mature rat brain
A. J. Nelson, J. M. Juraska, B. G. Ragan, and G. A. Iwamoto 1582
- Heat stress alters hemodynamic responses during the Valsalva maneuver
S. L. Davis and C. G. Crandall 1591
- A phenomenological model that predicts forces generated when electrical stimulation is superimposed on submaximal volitional contractions
R. Perumal, A. S. Wexler, T. M. Kesar, A. Jancosko, Y. Laufer, and S. A. Binder-Macleod 1595
- Reduction of total lung capacity in obese men: comparison of total intrathoracic and gas volumes
R. A. Watson, N. B. Pride, E. L. Thomas, J. Fitzpatrick, G. Durighel, J. McCarthy, S. X. Morin, P. W. Ind, and J. D. Bell 1605
- Adiposity-independent sympathetic activity in black men
A. Abbas, L. S. Szczepaniak, M. Tuncel, J. M. McGavock, B. Huet, P. J. Fadel, Z. Wang, D. Arbique, R. Victor, and W. Vongpatanasin 1613
- A secondary reflex suppression phase is present in genioglossus but not tensor palatini in response to negative upper airway pressure
D. J. Eckert, J. P. Saboisky, A. S. Jordan, D. P. White, and A. Malhotra 1619
- The impact of the endothelin type A receptor on regional endothelin-1 turnover, in particular renal endothelin-1 release, in humans
E. Rullman, T. Gustafsson, and G. Ahlborg 1625

(Continued)

Insulin resistance for glucose uptake and Akt2 phosphorylation in the soleus, but not epitrochlearis, muscles of old vs. adult rats <i>N. Sharma, E. B. Arias, M. P. Sajjan, J. G. MacKrell, A. D. Bhat, R. V. Farese, and G. D. Cartee</i>	1631
Pulmonary O ₂ uptake and leg blood flow kinetics during moderate exercise are slowed by hyperventilation-induced hypocapnic alkalosis <i>L. M. K. Chin, G. J. F. Heigenhauser, D. H. Paterson, and J. M. Kowalchuk</i>	1641
CCL2 and CCR2 polymorphisms are associated with markers of exercise-induced skeletal muscle damage <i>M. J. Hubal, J. M. Devaney, E. P. Hoffman, E. J. Zamburski, H. Gordish-Dressman, A. K. Kearns, J. S. Larkin, K. Adham, R. R. Patel, and P. M. Clarkson</i>	1651
Recruitment and derecruitment characteristics of motor units in a hand muscle of young and old adults <i>M. Jesunathadas, A. R. Marmon, J. M. Gibb, and R. M. Enoka</i>	1659
Phase-rectified signal averaging as a sensitive index of autonomic changes with aging <i>L. M. Campana, R. L. Owens, G. D. Clifford, S. D. Pittman, and A. Malhotra</i>	1668
Why wrapping premature neonates to prevent hypothermia can predispose to overheating <i>B. Agourram, V. Bach, P. Tourneux, G. Krim, S. Delanaud, and J.-P. Libert</i>	1674
Thrombin and exercise similarly influence expression of cell cycle genes in cultured putative endothelial progenitor cells <i>M. M. Lockard, S. Witkowski, N. T. Jenkins, E. E. Spangenburg, T. O. Obisesan, and J. M. Hagberg</i>	1682
Cortical and brain stem changes in neural activity during static handgrip and postexercise ischemia in humans <i>M. Sander, V. G. Macefield, and L. A. Henderson</i>	1691
Dynamic cerebral autoregulation during and after handgrip exercise in humans <i>S. Ogoh, K. Sato, T. Akimoto, A. Oue, A. Hirasawa, and T. Sadamoto</i>	1701
Molecular structure of tail tendon fibers in TIEG1 knockout mice using synchrotron diffraction technology <i>L. Gumez, S. F. Bensamoun, J. Doucet, O. Haddad, J. R. Hawse, M. Subramaniam, T. C. Spelsberg, and C. Pichon</i>	1706
Effects of region and sex on the mechanical properties of the glenohumeral capsule during uniaxial extension <i>C. A. Voycheck, E. J. Rainis, P. J. McMahon, J. A. Weiss, and R. E. Debski</i>	1711
High-dose antioxidant vitamin C supplementation does not prevent acute exercise-induced increases in markers of skeletal muscle mitochondrial biogenesis in rats <i>G. D. Wadley and G. K. McConell</i>	1719
Is interindividual variability of EMG patterns in trained cyclists related to different muscle synergies? <i>F. Hug, N. A. Turpin, A. Guével, and S. Dorel</i>	1727
The effects of loading and estrogen on rat bone growth <i>O. V. Leppänen, H. Sievänen, J. Jokihaara, I. Pajamäki, P. Kannus, D. M. Cooper, and T. L. N. Järvinen</i>	1737
EGCG protects against oxidized LDL-induced endothelial dysfunction by inhibiting LOX-1-mediated signaling <i>H.-C. Ou, T.-Y. Song, Y.-C. Yeh, C.-Y. Huang, S.-F. Yang, T.-H. Chiu, K.-L. Tsai, K.-L. Chen, Y.-J. Wu, C.-S. Tsai, L.-Y. Chang, W.-W. Kuo, and S.-D. Lee</i>	1745
Intrauterine inflammation causes pulmonary hypertension and cardiovascular sequelae in preterm lambs <i>G. R. Polglase, S. B. Hooper, A. W. Gill, B. J. Allison, K. J. Crossley, T. J. Moss, I. Nitsos, J. J. Pillow, and M. Kluckow</i>	1757
Short-term exercise training prevents micro- and macrovascular disease following coronary stenting <i>X. Long, I. N. Bratz, M. Alloosh, J. M. Edwards, and M. Sturek</i>	1766

Skeletal muscle dysfunction in muscle-specific LKB1 knockout mice <i>D. M. Thomson, C. R. Hancock, B. G. Evanson, S. G. Kenney, B. B. Malan, A. D. Mongillo, J. D. Brown, S. Hepworth, N. Fillmore, A. C. Parcell, D. L. Kooyman, and W. W. Winder</i>	1775
---	------

HIGHLIGHTED TOPIC
Central CO₂ Chemoreception in Cardiorespiratory Control

Review: Hypercapnia causes cellular oxidation and nitrosation in addition to acidosis: implications for CO ₂ chemoreceptor function and dysfunction <i>J. B. Dean</i>	1786
Review: CO ₂ chemoreception in cardiorespiratory control <i>R. W. Putnam</i>	1796
Review: Glia modulation of the extracellular milieu as a factor in central CO ₂ chemosensitivity and respiratory control <i>J. S. Erlichman and J. C. Leiter</i>	1803

Pulmonary Physiology and Pathophysiology in Obesity

Onset of obesity in carboxypeptidase E-deficient mice and effect on airway responsiveness and pulmonary responses to ozone <i>R. A. Johnston, M. Zhu, C. B. Hernandez, E. S. Williams, and S. A. Shore</i>	1812
---	------

POINT: COUNTERPOINT
IGF is/is not the major physiological regulator of muscle mass

Point: IGF is the major physiological regulator of muscle mass <i>C. E. Stewart and J. M. Pell</i>	1820
Counterpoint: IGF is not the major physiological regulator of muscle mass <i>M. Flueck and G. Goldspink</i>	1821
Rebuttal from Stewart and Pell	1823
Rebuttal from Flueck and Goldspink	1824
Comments on Point:Counterpoint: IGF is/is not the major physiological regulator of muscle mass <i>E. E. Spangenburg, S. M. Phillips, S. Y. Yang, A. Musaro, B. S. Shenkman, E. Kachaeva, O. Turtikova, T. Leinsoo, E. Lysenko, K. Baar, D. L. Hamilton, A. Philp, E. R. Barton, A. Philippou, J. Svensson, K. Sjogren, C. Ohlsson, P. T. Loughna, S. D. R. Harridge, C. Velloso, T. Shavlakadze, M. D. Grounds, M. Vinciguerra, M. Hede, N. Rosenthal, K. A. Esser, J. J. McCarthy, M. Miyazaki, Y.-H. Song, and B. T. Ameredes</i>	1825
Letters to the Editor: Last Word on Point:Counterpoint: IGF is the major physiological regulator of muscle mass <i>C. E. Stewart and J. M. Pell</i>	1832
Last Word on Point:Counterpoint: IGF is/is not the major physiological regulator of muscle mass <i>M. Flueck and G. Goldspink</i>	1833
