

JOURNAL OF APPLIED PHYSIOLOGY

FEBRUARY 2010/Volume 108, Number 2

REVIEW

- The 2009 Carl Ludwig Lecture: pathophysiology of the human sympathetic nervous system in cardiovascular diseases: the transition from mechanisms to medical management
M. Esler 227

INVITED EDITORIAL

- Tiny bubbles (see "Signals consistent with microbubbles detected in legs of normal human subjects after exercise," page 240)
R. T. Mahon 238

- Signals consistent with microbubbles detected in legs of normal human subjects after exercise
J. C. Wilbur, S. D. Phillips, T. G. Donoghue, D. L. Alvarenga, D. A. Knaus, P. J. Magari, and J. C. Buckey 240
- Carbohydrate exerts a mild influence on fluid retention following exercise-induced dehydration
K. L. Osterberg, S. E. Pallardy, R. J. Johnson, and C. A. Horswill 245
- Diagrammatic analysis of the respiratory action of the diaphragm
T. A. Wilson and A. D. Troyer 251
- Airway responses to methacholine and exercise at high altitude in healthy lowlanders
R. Pellegrino, P. Pompilio, M. Quaranta, A. Aliverti, B. Kayser, G. Miserocchi, V. Fasano, A. Cogo, M. Milanese, G. Cornara, V. Brusasco, and R. Dellacà 256
- Testosterone represses ubiquitin ligases atrogin-1 and Murf-1 expression in an androgen-sensitive rat skeletal muscle in vivo
M. Pires-Oliveira, A. L. G. C. Maragno, L. T. Parreiras-e-Silva, T. Chiavegatti, M. D. Gomes, and R. O. Godinho 266
- Leucine modulates contraction- and insulin-stimulated glucose transport and upstream signaling events in rat skeletal muscle
N. Iwanaka, T. Egawa, N. Satoubu, K. Karaike, X. Ma, S. Masuda, and T. Hayashi 274
- Priming exercise speeds pulmonary O₂ uptake kinetics during supine "work-to-work" high-intensity cycle exercise
F. J. DiMenna, D. P. Wilkerson, M. Burnley, S. J. Bailey, and A. M. Jones 283
- Local sensory nerve control of skin blood flow during local warming in type 2 diabetes mellitus
N. A. Strom, J. R. Sawyer, S. K. Roberts, S. M. Kingsley-Berg, and N. Charkoudian 293
- Effects of excess corticosterone on LKB1 and AMPK signaling in rat skeletal muscle
G. N. Nakken, D. L. Jacobs, D. M. Thomson, N. Fillmore, and W. W. Winder 298
- Elevation of myostatin and FOXOs in prolonged muscular impairment induced by eccentric contractions in rat medial gastrocnemius muscle
E. Ochi, T. Hirose, K. Hiranuma, S.-K. Min, N. Ishii, and K. Nakazato 306

(Continued)

Cover: The January through March 2010 Highlighted Topics series examines Pulmonary Physiology and Pathophysiology in Obesity in a series of review articles written by a panel of international experts. This series was conceived and edited by Guest Editors Dr. Anne Dixon, Dr. Fernando Holguin, and Coordinating Associate Editor Dr. Chris O'Donnell. We acknowledge Steve Graepel, illustrator of the cover design. This illustration is copyrighted by Steve Graepel and reproduced with permission.

(Contents continued)

- Distributed lag and spline modeling for predicting energy expenditure from accelerometry in youth
L. Choi, K. Y. Chen, S. A. Acra, and M. S. Buchowski 314
- Local ascorbate administration inhibits the adrenergic vasoconstrictor response to local cooling in the human skin
F. Yamazaki 328
- Resting and exercise-induced IL-6 levels in children with Type 1 diabetes reflect hyperglycemic profiles during the previous 3 days
J. S. Rosa, R. L. Flores, S. R. Oliver, A. M. Pontello, F. P. Zaldivar, and P. R. Galassetti 334
- Effect of aerobic exercise on tumor physiology in an animal model of human breast cancer
L. W. Jones, B. L. Viglianti, J. A. Tashjian, S. M. Kothadia, S. T. Keir, S. J. Freedland, M. Q. Potter, E. J. Moon, T. Schroeder, J. E. Herndon II, and M. W. Dewhirst 343
- Muscle blood flow responses to dynamic exercise in young obese humans
J. K. Limberg, M. D. De Vita, G. M. Blain, and W. G. Schrage 349
- Force depression in single myofibrils
V. Joumaa and W. Herzog 356
- Timing of the initial muscle biopsy does not affect the measured muscle protein fractional synthesis rate during basal, postabsorptive conditions
G. I. Smith, D. T. Villareal, C. P. Lambert, D. N. Reeds, B. S. Mohammed, and B. Mittendorfer 363
- Effect of episodic hypoxia on the susceptibility to hypocapnic central apnea during NREM sleep
S. Chowdhuri, I. Shanidze, L. Pierchala, D. Belen, J. H. Mateika, and M. S. Badr 369
- Comparison of exogenous adenosine and voluntary exercise on human skeletal muscle perfusion and perfusion heterogeneity
I. Heinonen, J. Kempainen, K. Kaskinoro, J. E. Peltonen, R. Borra, M. M. Lindroos, V. Oikonen, P. Nuutila, J. Knuuti, Y. Hellsten, R. Boushel, and K. K. Kalliokoski 378
- State-dependent vs. central motor effects of ethanol on breathing
L. M. Vecchio, K. P. Grace, H. Liu, S. Harding, A. D. Lê, and R. L. Horner 387
- Airway narrowing assessed by anatomical optical coherence tomography in vitro: dynamic airway wall morphology and function
P. B. Noble, A. R. West, R. A. McLaughlin, J. J. Armstrong, S. Becker, P. K. McFawn, J. P. Williamson, P. R. Eastwood, D. R. Hillman, D. D. Sampson, and H. W. Mitchell 401
- Assessment of air space size characteristics by intercept (chord) measurement: an accurate and efficient stereological approach
L. Knudsen, E. R. Weibel, H. J. G. Gundersen, F. V. Weinstein, and M. Ochs 412

INNOVATIVE METHODOLOGY

- Effects of posture on regional pulmonary blood flow in rats as measured by PET
T. Richter, R. Bergmann, J. Pietzsch, I. Közle, F. Hofheinz, E. Schiller, M. Ragaller, and J. van den Hoff 422

HIGHLIGHTED TOPIC

Pulmonary Physiology and Pathophysiology in Obesity

- Review:** Obesity and upper airway control during sleep
A. R. Schwartz, S. P. Patil, S. Squier, H. Schneider, J. P. Kirkness, and P. L. Smith 430
- Review:** Childhood obesity and obstructive sleep apnea syndrome
R. Arens and H. Muzumdar 436
- The influence of end-expiratory lung volume on measurements of pharyngeal collapsibility
R. L. Owens, A. Malhotra, D. J. Eckert, D. P. White, and A. S. Jordan 445

POINT: COUNTERPOINT

Afferent feedback from fatigued locomotor muscles is/is not an important determinant of endurance exercise performance

Point: Afferent feedback from fatigued locomotor muscles is an important determinant of endurance exercise performance <i>M. Amann and N. H. Secher</i>	452
Counterpoint: Afferent feedback from fatigued locomotor muscles is not an important determinant of endurance exercise performance <i>S. Marcora</i>	454
Rebuttal from Amann and Scher	456
Rebuttal from Marcora	457
Comments on Point:Counterpoint: Afferent feedback from fatigued locomotor muscles is/is not an important determinant of endurance exercise performance <i>S. Perrey, B. de P. C. Smirmaul, E. B. Fontes, T. D. Noakes, A. Bosio, F. M. Impellizzeri, R. Meeusen, F. Y. Nakamura, C. R. Abbiss, J. J. Peiffer, S. A. Smith, M. N. Murphy, D. J. Bishop, A. de Vrijer, J. W. Williamson, O. Girard, S. Racinais, N. Place, B. Kayser, G. P. Millet, G. Y. Millet, F. J. Hettinga, A. R. Light, E. Dousset, B. I. Prilutsky, R. J. Gregor, P. Gagnon, D. Saey, F. Maltais, J. L. Taylor, S. C. Gandevia, M. Burnley, A. M. Jones, and R. A. Wright</i>	458
Letters to the Editor: Last Word on Point:Counterpoint: Afferent feedback from fatigued locomotor muscles is an important determinant of endurance exercise performance <i>M. Amann and N. H. Secher</i>	469
Last Word on Point:Counterpoint: Afferent feedback from fatigued locomotor muscles is not an important determinant of endurance exercise performance <i>S. Marcora</i>	470
