

JOURNAL OF APPLIED PHYSIOLOGY

JANUARY 2009/Volume 106, Number 1

INVITED EDITORIAL

Weight loss in obesity reduces epicardial fat thickness; so what? (see "Aerobic exercise training reduces epicardial fat in obese men," page 5)

H. S. Sacks

1

Peptide amidation: a push me, don't pull you for the morbidities in sleep apnea (see "Intermittent hypoxia activates peptidylglycine α -amidating monooxygenase in rat brain stem via reactive oxygen species-mediated proteolytic processing," page 12)

S. Veasey

3

Aerobic exercise training reduces epicardial fat in obese men

M.-K. Kim, T. Tomita, M.-J. Kim, H. Sasai, S. Maeda, and K. Tanaka

5

Intermittent hypoxia activates peptidylglycine α -amidating monooxygenase in rat brain stem via reactive oxygen species-mediated proteolytic processing

S. D. Sharma, G. Raghuraman, M.-S. Lee, N. R. Prabhakar, and G. K. Kumar

12

Na⁺/H⁺ exchange inhibitor cariporide attenuates skeletal muscle infarction when administered before ischemia or reperfusion

S. E. McAllister, M. A. Moses, K. Jindal, H. Ashrafpour, N. J. Cahoon, N. Huang, P. C. Neligan, C. R. Forrest, J. E. Lipa, and C. Y. Pang

20

Cardiorespiratory interactions in patients with atrial flutter

M. Masè, M. Disertori, and F. Ravelli

29

Differences between brain mass and body weight scaling to height: potential mechanism of reduced mass-specific resting energy expenditure of taller adults

S. B. Heymsfield, T. Chirachariyavej, I. J. Rhyu, C. Roongpisuthipong, M. Heo, and A. Pietrobelli

40

Internet-delivered lifestyle physical activity intervention: limited inflammation and antioxidant capacity efficacy in overweight adults

D. T. Smith, L. J. Carr, C. Dorozynski, and C. Gomashe

49

Mesenteric lymph duct ligation prevents trauma/hemorrhage shock-induced cardiac contractile dysfunction

J. T. Sambol, M. A. Lee, F. J. Caputo, K. Kawai, C. Badami, T. Kawai, E. A. Deitch, and A. Yatani

57

Voluntary wheel running initially increases adrenal sensitivity to adrenocorticotrophic hormone, which is attenuated with long-term training

J. E. Campbell, N. Rakhshani, S. Fediuc, S. Bruni, and M. C. Riddell

66

Four weeks of speed endurance training reduces energy expenditure during exercise and maintains muscle oxidative capacity despite a reduction in training volume

F. M. Iai, Y. Hellsten, J. J. Nielsen, M. Fernström, K. Sahlin, and J. Bangsbo

73

(Continued)

Cover: The January through March 2009 Highlighted Topics series examines the physiology and pathophysiology of the hyperbaric and diving environments in a series of review articles written by a panel of international experts. This series was conceived and edited by Guest Editor David Pendergast and Coordinating Editor Claes Lundgren. We acknowledge Steve Graepel, illustrator of the cover design. This illustration is copyrighted by Steve Graepel and reproduced with permission.

This Journal is printed on "acid-free" paper.

(Contents continued)

A further analysis of why pulmonary venous pressure rises after the onset of LV dysfunction <i>S. Magder, S. Veerassamy, and J. H. T. Bates</i>	81
Fluid and electrolyte supplementation after prolonged moderate-intensity exercise enhances muscle glycogen resynthesis in Standardbred horses <i>A. P. Waller, G. J. F. Heigenhauser, R. J. Geor, L. L. Spriet, and M. I. Lindinger</i>	91
Changes of surface and t-tubular membrane excitability during fatigue with repeated tetani in isolated mouse fast- and slow-twitch muscle <i>S. P. Cairns, A. J. Taberner, and D. S. Loiselle</i>	101
Impairment of coronary flow reserve in aortic stenosis <i>D. Garcia, P. G. Camici, L.-G. Durand, K. Rajappan, E. Gaillard, O. E. Rimoldi, and P. Pibarot</i>	113
Reducing dietary fat from a meal increases the bioavailability of exogenous carbohydrate without altering plasma glucose concentration <i>N. D. Knuth, C. R. Shrivastava, and J. F. Horowitz</i>	122
Cytokines derived from cultured skeletal muscle cells after mechanical strain promote neutrophil chemotaxis in vitro <i>J. M. Peterson and F. X. Pizza</i>	130
Neural circuits controlling diaphragm function in the cat revealed by transneuronal tracing <i>J. H. Lois, C. D. Rice, and B. J. Yates</i>	138
Dynamic cerebral autoregulation during repeated squat-stand maneuvers <i>J. A. H. R. Claassen, B. D. Levine, and R. Zhang</i>	153
Cessation of daily wheel running differentially alters fat oxidation capacity in liver, muscle, and adipose tissue <i>M. J. Laye, R. S. Rector, S. J. Borengasser, S. P. Naples, G. M. Uptergrove, J. A. Ibdah, F. W. Booth, and J. P. Thyfault</i>	161
The relative lengthening of the myotendinous structures in the medial gastrocnemius during passive stretching differs among individuals <i>S. Abellana, N. Guissard, and J. Duchateau</i>	169
Effect of unloading followed by reloading on expression of collagen and related growth factors in rat tendon and muscle <i>K. M. Heinemeier, J. L. Olesen, F. Haddad, P. Schjerling, K. M. Baldwin, and M. Kjaer</i>	178
Diurnal cycle influences peripheral and brain iron levels in mice <i>E. L. Unger, C. J. Earley, and J. L. Beard</i>	187
Spaceflight effects on T lymphocyte distribution, function and gene expression <i>D. S. Gridley, J. M. Slater, X. Luo-Owen, A. Rizvi, S. K. Chapes, L. S. Stodieck, V. L. Ferguson, and M. J. Pecaut</i>	194
Fluid shear stress induces arterial differentiation of endothelial progenitor cells <i>S. Obi, K. Yamamoto, N. Shimizu, S. Kumagaya, T. Masumura, T. Sokabe, T. Asahara, and J. Ando</i>	203
Variations within oxygen-regulated gene expression in humans <i>J. T. S. Brooks, G. P. Elvidge, L. Glenny, J. M. Gleadle, C. Liu, J. Ragoussis, T. G. Smith, N. P. Talbot, L. Winchester, P. H. Maxwell, and P. A. Robbins</i>	212
Image-based finite element modeling of alveolar epithelial cell injury during airway reopening <i>H. L. Dailey, L. M. Ricles, H. C. Yalcin, and S. N. Ghadiali</i>	221
Thermal manipulations in late-term chick embryos have immediate and longer term effects on myoblast proliferation and skeletal muscle hypertrophy <i>Y. Piestun, M. Harel, M. Barak, S. Yahav, and O. Halevy</i>	233
Focal acidosis in the pre-Bötzing complex area of awake goats induces a mild tachypnea <i>K. L. Krause, H. V. Forster, S. E. Davis, T. Kiner, J. M. Bonis, L. G. Pan, and B. Qian</i>	241

(Continued)

(Contents continued)

- Blockade of AT₁ receptor partially restores vasoreactivity, NOS expression, and superoxide levels in cerebral and carotid arteries of hindlimb unweighting rats
R. Zhang, Y.-G. Bai, L.-J. Lin, J.-X. Bao, Y.-Y. Zhang, H. Tang, J.-H. Cheng, G.-L. Jia, X.-L. Ren, and J. Ma 251

- Exposure to cyclic intermittent hypoxia increases expression of functional NMDA receptors in the rat carotid body
Y. Liu, E. Sheng Ji, S. Xiang, R. Tamisier, J. Tong, J. Huang, and J. W. Weiss 259

INNOVATIVE METHODOLOGY

- Measuring partial body potassium in the legs of patients with spinal cord injury: a new approach
L. Wielopolski, L. M. Ramirez, A. M. Spungen, S. Swaby, P. Asselin, and W. A. Bauman 268

HIGHLIGHTED TOPIC

The Physiology and Pathophysiology of the Hyperbaric and Diving Environments

- Editorial:** The physiology and pathophysiology of the hyperbaric and diving environments
D. R. Pendergast and C. E. G. Lundgren 274
- Review:** The underwater environment: cardiopulmonary, thermal, and energetic demands
D. R. Pendergast and C. E. G. Lundgren 276
- Review:** The physiology and pathophysiology of human breath-hold diving
P. Lindholm and C. E. Lundgren 284
- Cardiac changes induced by immersion and breath-hold diving in humans
C. Marabotti, A. Scalzini, D. Cialoni, M. Passera, A. L'Abbate, and R. Bedini 293
- Selective vulnerability of the inner ear to decompression sickness in divers with right-to-left shunt: the role of tissue gas supersaturation
S. J. Mitchell and D. J. Doolette 298
- Vasoconstrictor responses in the upper and lower limbs to increases in transmural pressure
M. E. J. Lott, C. Hogeman, M. Herr, M. Bhagat, A. Kunselman, and L. I. Sinoway 302
- DNA damage after long-term repetitive hyperbaric oxygen exposure
M. Gröger, S. Öter, V. Simkova, M. Bolten, A. Koch, V. Warninghoff, M. Georgieff, C.-M. Muth, G. Speit, and P. Radermacher 311
- Predictors of increased PaCO₂ during immersed prone exercise at 4.7 ATA
A. D. Cherry, I. F. Forkner, H. J. Frederick, M. J. Natoli, E. A. Schinazi, J. P. Longphre, J. L. Conard, W. D. White, J. J. Freiburger, B. W. Stolp, N. W. Pollock, P. O. Doar, A. E. Boso, E. L. Alford, A. J. Walker, A. C. Ma, M. A. Rhodes, and R. E. Moon 316

Physiology of the Aging Vasculature

- Review:** Vascular endothelial senescence: from mechanisms to pathophysiology
J. D. Erusalimsky 326

(Continued)

(Contents continued)

- Review:** The telomerase tale in vascular aging: regulation by estrogens and nitric oxide signaling
A. Farsetti, A. Grasselli, S. Bacchetti, C. Gaetano, and M. C. Capogrossi 333

POINT: COUNTERPOINT

Maximal oxygen uptake is/is not limited by a central nervous system governor

- Point: Maximal oxygen uptake is limited by a central nervous system governor
T. D. Noakes, F. E. Marino 338
- Counterpoint: Maximal oxygen uptake is not limited by a central nervous system governor
B. Ekblom 339
- Rebuttal from Drs. Noakes and Marino 341
- Rebuttal from Dr. Ekblom 341
- Comments on Point:Counterpoint:** Maximal oxygen uptake is/is not limited by a central nervous system governor
R. J. Shephard, C. Foster, A. Lucia, D. R. Bassett, S. M. Marcora, J. González-Alonso, S. P. Mortensen, S. S. Cheung, A. D. Flouris, O. J. Kemi, J. A. L. Calbet, C. Lundby 343
- Letters to the Editor:** Last Word on Point:Counterpoint: Maximal oxygen uptake is/is not limited by a central nervous system governor
T. D. Noakes and F. E. Marino 347
- Last Word on Point:Counterpoint: Maximal oxygen uptake is/is not limited by a central nervous system governor
B. T. Ekblom 348
- Comment on Point:Counterpoint: Sickle cell trait should/should not be considered asymptomatic and as a benign condition during physical activity
D. Le Gallais 349

LETTERS TO THE EDITOR

- Interpreting the phosphocreatine time constant in aerobically exercising skeletal muscle
G. Kemp 350
- Reply to Kemp
M. P. Francescato, V. Cettolo, and P. E. di Prampero 351
