

JOURNAL OF APPLIED PHYSIOLOGY

OCTOBER 2009/Volume 107, Number 4

EDITORIAL

- Impact factor and its role in academic promotion: A statement adopted by the International Respiratory Journal Editors Roundtable
J. A. Dempsey 1005

REVIEW

- Edward F. Adolph Distinguished Lecture: Muscle as an endocrine organ: IL-6 and other myokines
B. K. Pedersen 1006

INVITED EDITORIAL

- What to do about apnea of prematurity? (See "Stabilizing immature breathing patterns of preterm infants using stochastic mechanosensory stimulation," page 1017)
R. J. Martin and C. G. Wilson 1015

-
- Stabilizing immature breathing patterns of preterm infants using stochastic mechanosensory stimulation
E. Bloch-Salisbury, P. Indic, F. Bednarek, and D. Paydarfar 1017

- Sulforaphane treatment protects skeletal muscle against damage induced by exhaustive exercise in rats
M. Malaguti, C. Angeloni, N. Garatachea, M. Baldini, E. Leoncini, P. S. Collado, G. Tei, M. Falconi, J. Gonzalez-Gallego, and S. Hrelia 1028

- Intracoronary intermedin 1-47 augments cardiac perfusion and function in anesthetized pigs: role of calcitonin receptors and β -adrenoreceptor-mediated nitric oxide release
E. Grossini, C. Molinari, D. A. S. G. Mary, F. Uberti, P. P. Caimmi, and G. Vacca 1037

- Short-term pressure induced suppression of the short-latency response: a new methodology for investigating stretch reflexes
C. Leukel, J. Lundbye-Jensen, M. Gruber, A. T. Zuur, A. Gollhofer, and W. Taube 1051

- Cyclooxygenase and thromboxane/prostaglandin receptor contribute to aortic endothelium-dependent dysfunction in aging female spontaneously hypertensive rats
D. A. Graham and J. W. E. Rush 1059

- A simple method for assessing the energy cost of running during incremental tests
P. E. di Prampero, D. Salvadego, S. Fusi, and B. Grassi 1068

- Aging affects the cardiovascular responses to cold stress in humans
K. L. Hess, T. E. Wilson, C. L. Sauder, Z. Gao, C. A. Ray, and K. D. Monahan 1076

- Lung function in developing lambs: is it affected by preterm birth?
R. De Matteo, K. Snibson, B. Thompson, E. Koumoundouros, and R. Harding 1083

(Continued)

Cover: The October through December 2009 Highlighted Topics series examines the role of "clock genes" in cardio-metabolic disease in a series of review articles written by a panel of international experts. This series was conceived and edited by Coordinating Associate Editor Karyn Esser and Guest Editor Martin Young. We acknowledge Steve Graepel, illustrator of the cover design. This illustration is copyrighted by Steve Graepel and reproduced with permission.

(Contents continued)

Galvanic vestibular stimulation counteracts hypergravity-induced plastic alteration of vestibulo-cardiovascular reflex in rats <i>C. Abe, K. Tanaka, C. Awazu, and H. Morita</i>	1089
Dietary quercetin supplementation is not ergogenic in untrained men <i>K. J. Cureton, P. D. Tomporowski, A. Singhal, J. D. Pasley, K. A. Bigelman, K. Lambourne, J. L. Trilk, K. K. McCully, M. J. Arnaud, and Q. Zhao</i>	1095
Moderate intensity of regular exercise improves cardiac SR Ca ²⁺ uptake activity in ovariectomized rats <i>T. Bupha-Intr, J. Laosiripisan, and J. Wattanapernpool</i>	1105
Influence of central command and muscle afferent activation on anterior cerebral artery blood velocity responses to calf exercise in humans <i>L. C. Vianna, C. G. S. Araujo, and J. P. Fisher</i>	1113
Ketorolac alters blood flow during normothermia but not during hyperthermia in middle-aged human skin <i>L. A. Holowatz, J. D. Jennings, J. A. Lang, and W. L. Kenney</i>	1121
Adenosine receptor antagonist and augmented vasodilation during hypoxic exercise <i>D. P. Casey, B. D. Madery, T. L. Pike, J. H. Eisenach, N. M. Dietz, M. J. Joyner, and B. W. Wilkins</i>	1128
Myoglobin concentration in skeletal muscle fibers of chronic heart failure patients <i>M. A. Bekedam, B. J. van Beek-Harmsen, W. van Mechelen, A. Boonstra, and W. J. van der Laarse</i>	1138
Dietary nitrate supplementation reduces the O ₂ cost of low-intensity exercise and enhances tolerance to high-intensity exercise in humans <i>S. J. Bailey, P. Winyard, A. Vanhatalo, J. R. Blackwell, F. J. DiMenna, D. P. Wilkerson, J. Tarr, N. Benjamin, and A. M. Jones</i>	1144
Combined effects of fatigue and eccentric damage on muscle power <i>S. J. Choi and J. J. Widrick</i>	1156
Acute hypoxia impairs dynamic cerebral autoregulation: results from two independent techniques <i>A. W. Subudhi, R. B. Panerai, and R. C. Roach</i>	1165
Effects of aging on human skeletal muscle after immobilization and retraining <i>C. Suetta, L. G. Hvid, L. Justesen, U. Christensen, K. Neergaard, L. Simonsen, N. Ortenblad, S. P. Magnusson, M. Kjaer, and P. Aagaard</i>	1172
Isometric contractions reduce plantar flexor moment, Achilles tendon stiffness, and neuromuscular activity but remove the subsequent effects of stretch <i>A. D. Kay and A. J. Blazevich</i>	1181
Neuromuscular transmission failure and muscle fatigue in ankle muscles of the adult rat after spinal cord injury <i>K. Ollivier-Lanvin, M. A. Lemay, A. Tessler, and A. S. Burns</i>	1190
Computational modeling of flow and gas exchange in models of the human maxillary sinus <i>C. M. Hood, R. C. Schroter, D. J. Doorly, E. J. S. M. Blenke, and N. S. Tolley</i>	1195
Rapid muscle atrophy response to unloading: pretranslational processes involving MHC and actin <i>J. M. Giger, P. W. Bodell, M. Zeng, K. M. Baldwin, and F. Haddad</i>	1204
Systemic hypoxia enhances exercise-mediated bactericidal and subsequent apoptotic responses in human neutrophils <i>J.-S. Wang and Y.-T. Chiu</i>	1213
Maturation and long-term hypoxia alters Ca ²⁺ -induced Ca ²⁺ release in sheep cerebrovascular sympathetic neurons <i>E. J. Behringer, L. D. Leite, N. E. Buchholz, M. G. Keeney, W. J. Pearce, C. K. Vanterpool, S. M. Wilson, and J. N. Buchholz</i>	1223
CNTF 1357 G → A polymorphism and the muscle strength response to resistance training <i>S. Walsh, B. K. Kelsey, T. J. Angelopoulos, P. M. Clarkson, P. M. Gordon, N. M. Moyna, P. S. Visich, R. F. Zoeller, R. L. Seip, S. Bilbie, P. D. Thompson, E. P. Hoffman, T. B. Price, J. M. Devaney, and L. S. Pescatello</i>	1235

(Continued)

(Contents continued)

- The phenotype and potential origin of nestin⁺ cardiac myocyte-like cells following infarction
P. C. Béguin, V. El-Helou, J. Assimakopoulos, R. Clément, H. Gosselin, R. Brugada, L. Villeneuve, C. V. Rohlicek, D. Del Duca, N. Lapointe, J. L. Rouleau, and A. Calderone 1241
- Arginase inhibition restores NOS coupling and reverses endothelial dysfunction and vascular stiffness in old rats
J. H. Kim, L. J. Bugaj, Y. J. Oh, T. J. Bivalacqua, S. Ryoo, K. G. Soucy, L. Santhanam, A. Webb, A. Camara, G. Sikka, D. Nyhan, A. A. Shoukas, M. Iliés, D. W. Christianson, H. C. Champion, and D. E. Berkowitz 1249
- Quantification of lung microstructure with hyperpolarized ³He diffusion MRI
D. A. Yablonskiy, A. L. Sukstanskii, J. C. Woods, D. S. Gierada, J. D. Quirk, J. C. Hogg, J. D. Cooper, and M. S. Conradi 1258
- Muscle apoptosis is induced in pressure-induced deep tissue injury
P. M. Siu, E. W. Tam, B. T. Teng, X. M. Pei, J. W. Ng, I. F. Benzie, and A. F. Mak 1266
- In vivo intramuscular fascicle-aponeuroses dynamics of the human medial gastrocnemius during plantarflexion and dorsiflexion of the foot
D. D. Shin, J. A. Hodgson, V. R. Edgerton, and S. Sinha 1276

INNOVATIVE METHODOLOGIES

- Effects of vitamin E on mitochondrial dysfunction and asthma features in an experimental allergic murine model
U. Mabalirajan, J. Aich, G. D. Leishangthem, S. K. Sharma, A. K. Dinda, and B. Ghosh 1285
- Breath-by-breath measurement of particle deposition in the lung of spontaneously breathing rats
S. Karrasch, G. Eder, I. Bolle, A. Tsuda, and H. Schulz 1293
- An artificial neural network to estimate physical activity energy expenditure and identify physical activity type from an accelerometer
J. Staudenmayer, D. Pober, S. Crouter, D. Bassett, and P. Freedson 1300

TRANSLATIONAL PHYSIOLOGY

- No major sex differences in muscle protein synthesis rates in the postabsorptive state and during hyperinsulinemia-hyperaminoacidemia in middle-aged adults
G. I. Smith, P. Atherton, D. N. Reeds, B. S. Mohammed, H. Jaffery, D. Rankin, M. J. Rennie, and B. Mittendorfer 1308

HIGHLIGHTED TOPIC

The Role of Clock Genes in Cardiometabolic Disease

- Editorial:** The role of clock genes in cardiometabolic disease
K. A. Esser and M. E. Young 1316
- Review:** Diurnal physiology: core principles with application to the pathogenesis, diagnosis, prevention, and treatment of myocardial hypertrophy and failure
M. J. Sole and T. A. Martino 1318
- Review:** Pressed for time: the circadian clock and hypertension
R. D. Rudic and D. J. Fulton 1328
- Review:** Anticipating anticipation: pursuing identification of cardiomyocyte circadian clock function
M. E. Young 1339
- Effects of acute hypoxia and hyperthermia on the permeability of the blood-brain barrier in adult rats
S. S. Natah, S. Srinivasan, Q. Pittman, Z. Zhao, and J. F. Dunn 1348
