

JOURNAL OF APPLIED PHYSIOLOGY

AUGUST 2010/Volume 109, Number 2

INVITED EDITORIALS

- The muscle metaboreflex: reining in the heart? (see "Muscle metaboreflex-induced coronary vasoconstriction functionally limits increases in ventricular contractility," page 271)
U. A. Leuenberger 263
- The ins and outs of deep breathing: mechanisms of respiratory motor plasticity (see "Phrenicotomy alters phrenic long-term facilitation following intermittent hypoxia in anesthetized rats," page 279)
J. Peever 265
- Can we cure airway hyperresponsiveness with a gym membership? (see "Effects of exercise training on airway responsiveness and airway cells in healthy subjects," page 288)
D. G. Chapman, N. Berend, G. G. King, and C. M. Salome 267
- The multiscale manifestations of airway smooth muscle contraction in the lung (see "Tidal stretches do not modulate responsiveness of intact airways in vitro," page 295)
J. H. T. Bates 269
-
- Muscle metaboreflex-induced coronary vasoconstriction functionally limits increases in ventricular contractility
M. Coutsos, J. A. Sala-Mercado, M. Ichinose, Z. Li, E. J. Dawe, and D. S. O'Leary 271
- Phrenicotomy alters phrenic long-term facilitation following intermittent hypoxia in anesthetized rats
M. S. Sandhu, K. Z. Lee, R. F. Fregosi, and D. D. Fuller 279
- Effects of exercise training on airway responsiveness and airway cells in healthy subjects
N. Scichilone, G. Morici, D. Zangla, L. Chimenti, E. Davi, S. Reitano, A. Paternò, R. Santagata, A. Tognias, V. Bellia, and M. R. Bonsignore 288
- Tidal stretches do not modulate responsiveness of intact airways in vitro
A. S. LaPrad, T. L. Szabo, B. Suki, and K. R. Lutchen 295
- Age-related changes in carotid vascular responses to adenosine and nitric oxide in the rat: in vitro and in vivo studies
N. M. Omar and J. M. Marshall 305
- Age-related changes in the sympathetic innervation of cerebral vessels and in carotid vascular responses to norepinephrine in the rat: in vitro and in vivo studies
N. M. Omar and J. M. Marshall 314
- Sleep state dependence of ventilatory long-term facilitation following acute intermittent hypoxia in Lewis rats
A. Nakamura, E. B. Olson, Jr., J. Terada, J. M. Wenninger, G. E. Bisgard, and G. S. Mitchell 323
- Muscle contractile activity regulates Sirt3 protein expression in rat skeletal muscles
F. Hokari, E. Kawasaki, A. Sakai, K. Koshinaka, K. Sakuma, and K. Kawanaka 332
- Skeletal muscle adaptations following blood flow-restricted training during 30 days of muscular unloading
S. B. Cook, K. A. Brown, K. DeRuisseau, J. A. Kanaley, and L. L. Ploutz-Snyder 341

Cover: The July through September 2010 Highlighted Topics series examines Epigenetics in Health and Disease in a series of review articles written by a panel of international experts. This series was conceived and edited by Coordinating Associate Editor Chris DeSouza and Guest Editor Thomas Johnson. We acknowledge Steve Graepel, illustrator of the cover design. This illustration is copyrighted by Steve Graepel and reproduced with permission.

(Contents continued)

Partial weight suspension: a novel murine model for investigating adaptation to reduced musculoskeletal loading <i>E. B. Wagner, N. P. Granzella, H. Saito, D. J. Newman, L. R. Young, and M. L. Boucsein</i>	350
No effect of arm-crank exercise on diaphragmatic fatigue or ventilatory constraint in Paralympic athletes with cervical spinal cord injury <i>B. J. Taylor, C. R. West, and L. M. Romer</i>	358
Effect of limb muscle fatigue on perception of respiratory effort in healthy subjects <i>A. Grippo, R. Carrai, L. Chiti, G. I. Bruni, G. Scano, and R. Duranti</i>	367
Influence of vagal afferents on supraspinal and spinal respiratory activity following cervical spinal cord injury in rats <i>K.-Z. Lee, M. S. Sandhu, B. J. Dougherty, P. J. Reier, and D. D. Fuller</i>	377
Expiratory muscle loading increases intercostal muscle blood flow during leg exercise in healthy humans <i>D. Athanassopoulos, Z. Louvaris, E. Cherouveim, V. Andrianopoulos, C. Roussos, S. Zakynthinos, and I. Vogiatzis</i>	388
The series-elastic shock absorber: tendons attenuate muscle power during eccentric actions <i>T. J. Roberts and E. Azizi</i>	396
Breathing patterns during cardiac arrest <i>P. Haouzi, N. Ahmadpour, H. J. Bell, S. Artman, J. Banchs, S. Samii, M. Gonzalez, and K. Gleeson</i>	405
Onset of pulmonary ventilation in fetal sheep produces pial arteriolar constriction dependent on cytochrome p450 ω -hydroxylase activity <i>H. Ohata, D. Gebremedhin, J. Narayanan, D. R. Harder, and R. C. Koehler</i>	412
Left-to-right systolic ventricular interaction in patients undergoing biventricular stimulation for dilated cardiomyopathy <i>G. Osculati, G. Malfatto, R. Chianca, and G. B. Perego</i>	418
Chronic hypoxia increases the gain of the hypoxic ventilatory response by a mechanism in the central nervous system <i>K. A. Wilkinson, K. Huey, B. Dinger, L. He, S. Fidone, and F. L. Powell</i>	424
Effect of glycogen availability on human skeletal muscle protein turnover during exercise and recovery <i>K. R. Howarth, S. M. Phillips, M. J. MacDonald, D. Richards, N. A. Moreau, and M. J. Gibala</i>	431
Regional differences in length change and electromyographic heterogeneity in sternohyoid muscle during infant mammalian swallowing <i>N. Konow, A. Thexton, A. W. Crompton, and R. Z. German</i>	439
Sedentary aging increases resting and exercise-induced intramuscular free radical formation <i>D. M. Bailey, J. McEneny, O. Mathieu-Costello, R. R. Henry, P. E. James, J. M. McCord, S. Pietri, I. S. Young, and R. S. Richardson</i>	449
Inspiratory muscle training enhances pulmonary O ₂ uptake kinetics and high-intensity exercise tolerance in humans <i>S. J. Bailey, L. M. Romer, J. Kelly, D. P. Wilkerson, F. J. DiMenna, and A. M. Jones</i>	457
The effect of increased genioglossus activity and end-expiratory lung volume on pharyngeal collapse <i>A. S. Jordan, D. P. White, R. L. Owens, D. J. Eckert, S. Rahangdale, S. Yim-Yeh, and A. Malhotra</i>	469
Effects of erythropoietin administration on cerebral metabolism and exercise capacity in men <i>P. Rasmussen, E. M. Foged, R. Krogh-Madsen, J. Nielsen, T. R. Nielsen, N. V. Olsen, N. C. Petersen, T. A. Sørensen, N. H. Secher, and C. Lundby</i>	476
Effect of increased preload on the synthesized aortic blood pressure waveform <i>K. S. Heffernan, J. E. Sharman, E. S. Yoon, E. J. Kim, S. J. Jung, and S. Y. Jae</i>	484
The influence of priming exercise on oxygen uptake, cardiac output, and muscle oxygenation kinetics during very heavy-intensity exercise in 9- to 13-yr-old boys <i>A. R. Barker, A. M. Jones, and N. Armstrong</i>	491
Neonatal total liquid ventilation: is low-frequency forced oscillation technique suitable for respiratory mechanics assessment? <i>D. Bossé, A. Beaulieu, O. Avoine, P. Micheau, J.-P. Praud, and H. Walti</i>	501

(Continued)

(Contents continued)

Chronic AMP-activated protein kinase activation and a high-fat diet have an additive effect on mitochondria in rat skeletal muscle <i>N. Fillmore, D. L. Jacobs, D. B. Mills, W. W. Winder, and C. R. Hancock</i>	511
Concomitant administration of nitric oxide and glucocorticoids improves protection against bronchoconstriction in a murine model of asthma <i>S. Jonasson, G. Hedenstierna, and J. Hjoberg</i>	521
Local hemodynamic changes caused by main branch stent implantation and subsequent virtual side branch balloon angioplasty in a representative coronary bifurcation <i>A. R. Williams, B.-K. Koo, T. J. Gundert, P. J. Fitzgerald, and J. F. LaDisa, Jr.</i>	532
Effect of pravastatin on ventricular arrhythmias in infarcted rats: role of connexin43 <i>C.-C. Chen, H.-Y. Lien, Y.-J. Hsu, C.-C. Lin, C.-M. Shih, and T.-M. Lee</i>	541
Modeling the dynamics of airway constriction: effects of agonist transport and binding <i>S. D. Amin, A. Majumdar, U. Frey, and B. Suki</i>	553
Protective role of α -actinin-3 in the response to an acute eccentric exercise bout <i>B. Vincent, A. Windelinckx, H. Nielsens, M. Ramaekers, M. Van Leemputte, P. Hespel, and M. A. Thomis</i>	564

INNOVATIVE METHODOLOGY

Hyperpolarized ^3He magnetic resonance imaging-derived pulmonary pressure-volume curves <i>S. Choy, A. Wheatley, D. G. McCormack, and G. Parraga</i>	574
--	-----

HIGHLIGHTED TOPIC

Epigenetics in Health and Disease

Review: Epigenetic alterations in aging <i>S. Gonzalo</i>	586
Review: Epigenetics and cancer <i>R. Kanwal and S. Gupta</i>	598

POINT: COUNTERPOINT

Left ventricular volume during diastasis is/is not the physiological in vivo equilibrium volume and is/is not related to diastolic suction

Point: Left ventricular volume during diastasis is the physiological in vivo equilibrium volume and is related to diastolic suction <i>L. Shmuylovich, C. S. Chung, and S. J. Kovács</i>	606
Counterpoint: Left ventricular volume during diastasis is not the physiological in vivo equilibrium volume and is not related to diastolic suction <i>E. Yellin and S. D. Nikolic</i>	608
Rebuttal from Shmuylovich, Chung, and Kovacs	610
Rebuttal from Yellin and Nikolic	610
Comments on Point:Counterpoint: Left ventricular volume during diastasis is/is not the physiological in vivo equilibrium volume and is/is not related to diastolic suction <i>J. V. Tyber, K. H. Parker, E. W. Remme, O. A. Smiseth, M. Yildiz, A. Şahin, J. Bernejo, R. Yotti, Z. Can, W. C. Little, and T. Ohara</i>	612
Letters to the Editor: Last Word on Point:Counterpoint: Left ventricular volume during diastasis is the physiological in vivo equilibrium volume and is related to diastolic suction <i>L. Shmuylovich, C. S. Chung, and S. J. Kovács</i>	615
Last Word on Point:Counterpoint: Left ventricular volume during diastasis is not the physiological in vivo equilibrium volume and is not related to diastolic suction <i>E. L. Yellin and S. D. Nikolic</i>	616

CORRIGENDUM

Corrigendum for Green et al. Volume 105, September 2008, p. 1001–1004	617
