

JOURNAL OF APPLIED PHYSIOLOGY

MARCH 2010/Volume 108, Number 3

EDITORIAL

In Memoriam: Neil S. Cherniack, M.D. (1931–2009)

N. R. Prabhakar and M. Altose

471

INVITED EDITORIALS

Heterogeneity in human cardiovascular function contributes to a deeper understanding of integrative mechanisms (see “Age and sex influence the balance between maximal cardiac output and peripheral vascular reserve,” page 483)

N. Charkoudian

473

Origins of vascular disease: is fat where it's at? (see “Influence of exercise and perivascular adipose tissue on coronary artery vasomotor function in a familial hypercholesterolemic porcine atherosclerosis model,” page 490)

D. W. Stepp

475

PLIN1 gene: fat keeper and prevention switcher (see “Endurance exercise training effects on body fatness, $\dot{V}O_{2max}$, HDL-C subfractions, and glucose tolerance are influenced by a *PLIN* haplotype in older Caucasians,” page 498)

J. M. Ordovás and C. E. Smith

477

Late-systolic retrograde coronary flow: an old observation finally explained by a novel mechanism (see “Quantitative analysis of exercise-induced enhancement of early- and late-systolic retrograde coronary blood flow,” page 507)

J. V. Tyberg

479

Is there a place for esophageal manometry in the care of patients with injured lungs? (see “Esophageal pressures in acute lung injury: do they represent artifact or useful information about transpulmonary pressure, chest wall mechanics, and lung stress?” page 515)

R. D. Hubmayr

481

Age and sex influence the balance between maximal cardiac output and peripheral vascular reserve

S. J. Ridout, B. A. Parker, S. L. Smithmyer, J. U. Gonzales, K. C. Beck, and D. N. Proctor

483

Influence of exercise and perivascular adipose tissue on coronary artery vasomotor function in a familial hypercholesterolemic porcine atherosclerosis model

A. K. Bunker and M. H. Laughlin

490

Endurance exercise training effects on body fatness, $\dot{V}O_{2max}$, HDL-C subfractions, and glucose tolerance are influenced by a *PLIN* haplotype in older Caucasians

N. T. Jenkins, J. A. McKenzie, C. M. Damcott, S. Witkowski, and J. M. Hagberg

498

Quantitative analysis of exercise-induced enhancement of early- and late-systolic retrograde coronary blood flow

S. B. Bender, M. J. van Houwelingen, D. Merkus, D. J. Duncker, and M. H. Laughlin

507

Cover: The January through March 2010 Highlighted Topics series examines Pulmonary Physiology and Pathophysiology in Obesity in a series of review articles written by a panel of international experts. This series was conceived and edited by Guest Editors Dr. Anne Dixon, Dr. Fernando Holguin, and Coordinating Associate Editor Dr. Chris O'Donnell. We acknowledge Steve Graepel, illustrator of the cover design. This illustration is copyrighted by Steve Graepel and reproduced with permission.

(Contents continued)

Esophageal pressures in acute lung injury: do they represent artifact or useful information about transpulmonary pressure, chest wall mechanics, and lung stress? <i>S. H. Loring, C. R. O'Donnell, N. Behazin, A. Malhotra, T. Sarge, R. Ritz, V. Novack, and D. Talmor</i>	515
Role of sympathetic responses on the hemodynamic consequences of rapid changes in posture in humans <i>D. D. Sheriff, I. H. Nådland, and K. Toska</i>	523
Retrograde arterial leg blood flow during tilt-back from a head-up posture: importance of capacitive flows when arterial pressure changes <i>D. D. Sheriff, I. H. Nådland, and K. Toska</i>	533
The effect of oxygen on dynamic cerebral autoregulation: critical role of hypocapnia <i>S. Ogoh, H. Nakahara, P. N. Ainslie, and T. Miyamoto</i>	538
Rhythmic contraction generates adjustable passive stiffness in rabbit detrusor <i>A. M. Almasri, P. H. Ratz, H. Bhatia, A. P. Klausner, and J. E. Speich</i>	544
Energy deficit after exercise augments lipid mobilization but does not contribute to the exercise-induced increase in insulin sensitivity <i>S. A. Newsom, S. Schenk, K. M. Thomas, M. P. Harber, N. D. Knuth, N. Goldenberg, and J. F. Horowitz</i>	554
Can we identify a power-oriented polygenic profile? <i>J. R. Ruiz, D. Arteta, A. Buxens, M. Artieda, F. Gómez-Gallego, C. Santiago, T. Yvert, M. Morán, and A. Lucia</i>	561
Associations of polymorphisms of eight muscle- or metabolism-related genes with performance in Mount Olympus marathon runners <i>G. I. Tsianos, E. Evangelou, A. Boot, M. C. Zillikens, J. B. J. van Meurs, A. G. Uitterlinden, and J. P. A. Ioannidis</i>	567
Eccentric exercise induces nitric oxide synthase expression through nuclear factor- κ B modulation in rat skeletal muscle <i>E. Lima-Cabello, M. J. Cuevas, N. Garatachea, M. Baldini, M. Almar, and J. González-Gallego</i>	575
Effect of airway opening on production of exhaled particles <i>A.-C. Almstrand, B. Bake, E. Ljungström, P. Larsson, A. Bredberg, E. Mirgorodskaya, and A.-C. Olin</i>	584
Central role of nitric oxide synthase in AICAR and caffeine-induced mitochondrial biogenesis in L6 myocytes <i>G. K. McConell, G. P. Y. Ng, M. Phillips, Z. Ruan, S. L. Macaulay, and G. D. Wadley</i>	589
Acclimation to decompression sickness in rats <i>E. A. Montcalm-Smith, R. M. McCarron, W. R. Porter, R. S. Lillo, J. T. Thomas, and C. R. Auken</i>	596
Continuous estimates of dynamic cerebral autoregulation during transient hypocapnia and hypercapnia <i>N. E. Dineen, F. G. Brodie, T. G. Robinson, and R. B. Panerai</i>	604
Mylohyoid discharge of the in situ rat: a probe of pontile respiratory activities in eupnea and gasping <i>W. M. St.-John, A. H. Rudkin, and J. C. Leiter</i>	614
Time course and mechanisms of adaptations in cardiorespiratory fitness with endurance training in older and young men <i>J. M. Murias, J. M. Kowalchuk, and D. H. Paterson</i>	621
Carbohydrate feeding during recovery alters the skeletal muscle metabolic response to repeated sessions of high-intensity interval exercise in humans <i>A. J. R. Cochran, J. P. Little, M. A. Tarnopolsky, and M. J. Gibala</i>	628
Concentric muscle contractions before static stretching minimize, but do not remove, stretch-induced force deficits <i>A. D. Kay and A. J. Blazevich</i>	637
Operational point of neural cardiovascular regulation in humans up to 6 months in space <i>B. Verheyden, J. Liu, F. Beckers, and A. E. Aubert</i>	646

(Continued)

(Contents continued)

Sensitivity of 24-h EMG duration and intensity in the human vastus lateralis muscle to threshold changes <i>C. S. Klein, L. B. Peterson, S. Ferrell, and C. K. Thomas</i>	655
The role of nicotine on respiratory sensory gating measured by respiratory-related evoked potentials <i>P.-Y. S. Chan and P. W. Davenport</i>	662
Tendinopathy alters mechanical and material properties of the Achilles tendon <i>S. Arya and K. Kulig</i>	670
Role(s) of gravitational loading during developing period on the growth of rat soleus muscle fibers <i>F. Kawano, K. Goto, X. D. Wang, M. Terada, T. Ohira, N. Nakai, T. Yoshioka, and Y. Ohira</i>	676
Signaling responses after exposure to 5 α -dihydrotestosterone or 17 β -estradiol in norepinephrine-induced hypertrophy of neonatal rat ventricular myocytes <i>Y. E. Koshman, M. R. Piano, B. Russell, and D. W. Schwartz</i>	686

INNOVATIVE METHODOLOGIES

Analyses of mouse breath with ion mobility spectrometry: a feasibility study <i>W. Vautz, J. Nolte, A. Bufe, J. I. Baumbach, and M. Peters</i>	697
Contraction-by-contraction $\dot{V}O_2$ and computer-controlled pump perfusion as novel techniques to study skeletal muscle metabolism in situ <i>A. Hernández, M. L. Goodwin, N. Lai, M. E. Cabrera, J. R. McDonald, and L. B. Gladden</i>	705
Biaxial distension of precision-cut lung slices <i>C. Dassow, L. Wiechert, C. Martin, S. Schumann, G. Müller-Newen, O. Pack, J. Gutmann, W. A. Wall, and S. Uhlig</i>	713

HIGHLIGHTED TOPIC

Pulmonary Physiology and Pathophysiology in Obesity

Review: Obesity and lung inflammation <i>P. Mancuso</i>	722
Review: Does obesity produce a distinct asthma phenotype? <i>N. L. Lugogo, M. Kraft, and A. E. Dixon</i>	729
Review: Obesity, airway hyperresponsiveness, and inflammation <i>S. A. Shore</i>	735
Review: Obesity, adipokines, and lung disease <i>A. Sood</i>	744
Review: Obesity, asthma, and oxidative stress <i>F. Holguin and A. Fitzpatrick</i>	754

LETTERS TO THE EDITOR

Assessment of air space size and surface area <i>B. Lande and W. Mitzner</i>	760
Reply to Lande and Mitzner <i>L. Knudsen, E. R. Weibel, H. J. G. Gundersen, F. V. Weinstein, and M. Ochs</i>	761

CORRIGENDA

Corrigendum for Paulsen G et al., Volume 107, August 2009, p. 570–582	762
Corrigendum for Hansen P et al., Volume 108, January 2010, p. 47–52	763
