Special Issue

## Human Movement across the Lifespan: Learning, Synergies and Disease

Edited by

Jeffery J. Summers and Michael I. Garry

School of Psychology, University of Tasmania

and

Jan. P. Piek

School of Psychology & Speech Pathology, Curtin University of Technology, Perth,  
Western Australia, Australia

### Contents

#### Editorial

Human movement across the lifespan: Learning, synergies and disease, 9th Motor Control and Human Skill Conference 615

#### Section 1. Neural Correlates of Learning and Control

C. Smyth, J.J. Summers and M.I. Garry, Differences in motor learning success are associated with differences in M1 excitability 618

D.J. Kidgell and A.J. Pearce, Corticospinal properties following short-term strength training of an intrinsic hand muscle 631

#### Section 2. Synergies and Musculoskeletal Dynamics

M.L. Latash, Stages in learning motor synergies: A view based on the equilibrium-point hypothesis 642

P.D. Neilson and M.D. Neilson, On theory of motor synergies 655

A. de Rugy, Generalization of visuomotor adaptation to different muscles is less efficient: Experiment and model 684

Y. Oytam, D. Lloyd, C.S. Reid, A. de Rugy and R.G. Carson, A robotic apparatus that dictates torque fields around joints without affecting inherent joint dynamics 701

R.T. Bye and P.D. Neilson, The BUMP model of response planning: Intermittent predictive control accounts for 10Hz physiological tremor 713

J.G. Phillips and R.P. Ogeil, Curved motions in horizontal and vertical orientations 737

### Section 3. Visuomotor Integration

- J.L. Croft, C. Button and M. Dicks, Visual strategies of sub-elite cricket batsmen in response to different ball velocities 751
- G.J.P. Savelsbergh, S.H.A. Haans, M.K. Kooijman and P.M. van Kampen, A method to identify talent: Visual search and locomotion behavior in young football players 764

### Section 4. Motor and Associated Disorders in Children

- J.P. Piek, N.C. Barrett, L.M. Smith, D. Rigoli and N. Gasson, Do motor skills in infancy and early childhood predict anxious and depressive symptomatology at school age? 777
- J.G. Pearsall-Jones, J.P. Piek and F. Levy, Developmental Coordination Disorder and cerebral palsy: Categories or a continuum? 787
- N.C. Martin, J. Piek, G. Baynam, F. Levy and D. Hay, An examination of the relationship between movement problems and four common developmental disorders 799

### Section 5. Ageing and Movement Disorders

- C. Smolders, M. Doumas and R.T. Krampe, Posture and cognition interfere in later adulthood even without concurrent response production 809
- J.J. Summers, J. Lewis and H. Fujiyama, Aging effects on event and emergent timing in bimanual coordination 820
- P. Fok, M. Farrell and J. McMeeken, Prioritizing gait in dual-task conditions in people with Parkinson's 831
- B. Galna, A.T. Murphy and M.E. Morris, Obstacle crossing in people with Parkinson's disease: Foot clearance and spatiotemporal deficits 843
- J.H. Cauraugh, N. Lodha, S.K. Naik and J.J. Summers, Bilateral movement training and stroke motor recovery progress: A structured review and meta-analysis 853
